

Responsible Sourcing Policy

OF-POL-05 • ISSUED SEPTEMBER 2026 • REVIEW SEPTEMBER 2027

Why this matters

Our purchasing decisions affect workers, communities, suppliers, and the environment.

Supplier standards

Suppliers and subcontractors must follow applicable law, pay fairly, provide safe conditions, and oppose forced labour, trafficking, and child labour.

Environmental responsibility

We consider waste, transport, materials, and environmental controls when selecting goods and services.

Review

We monitor supplier performance and ask for evidence of responsible working practices where appropriate.
