

COMPANY POLICY

Health, Safety & Environmental Policy

MANAGING DIRECTOR Toby Green	ISSUED July 2026	REVIEW DATE July 2027	REFERENCE OF-POL-02
--	----------------------------	---------------------------------	-------------------------------

01 Our Approach

This policy meets the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999. We supply concrete flooring services and products across the UK from our London office.

Health and safety isn't separate from running a good business, it's part of it. We want a workplace where employees, clients, subcontractors, visitors, and the public are never put at risk by what we do.

- Safe plant, equipment, and systems of work, properly maintained.
- Clear information, instruction, training, and supervision for everyone who needs it.
- The right safety equipment and protective clothing, provided by us.
- Safe transport, storage, handling, and use of hazardous substances.

02 Environment

This follows the Environmental Protection Act 1990. Protecting the environment is part of how we do business, and every manager is responsible for putting it into practice.

- Conserving energy and using raw materials sustainably.
- Managing waste responsibly.
- Steadily reducing our environmental impact.

03 Smoking

We keep our workplace smoke-free, in line with the Health Act 2006. Smoking isn't allowed in any of our buildings or company vehicles.

04 Who's Responsible

Toby Green, our Managing Director, has overall responsibility for health and safety, including funding what's needed, making sure our systems meet the law, and monitoring how we're doing.

Everyone working for us must take reasonable care of themselves and others, cooperate with management, and report accidents, near misses, and misconduct to their supervisor straight away.

05 On Site

Ask your supervisor if you're ever unsure whether something affects your safety or anyone else's. Alcohol, drugs, and illegal substances have no place on our premises. Visitors sign in and out and are accompanied at all times.

Contractors must show us their safety policy meets the law, and must follow safety instructions from our site contact.

We carry out risk assessments to catch hazards before they cause harm, and train every employee in manual handling, PPE, and safe use of work equipment.

06 Protective Equipment

We issue suitable PPE, treating it as a last line of defence rather than the whole answer. We also issue respiratory protective equipment (RPE) where it's needed, note that beards and heavy stubble stop facemask-type respirators sealing properly.

07 Accidents and First Aid

Report every accident and incident, injury or not. We provide first aid facilities sized to the workplace and the work being done.

08 Construction (Design and Management) Regulations 2015

As a concrete flooring contractor, we know our duties under the CDM Regulations 2015. We make sure we have the skills and experience to work safely, cooperate fully with the Principal Contractor and Principal Designer, follow the Construction Phase Plan, and properly induct and supervise our operatives.

09 Control of Substances Hazardous to Health (COSHH)

Concrete flooring work can expose our operatives to hazardous substances, mainly respirable crystalline silica (RCS) dust and wet cement. We meet the COSHH Regulations 2002 strictly.

- Specific COSHH risk assessments for cutting, grinding, and pouring.
- Wet-cutting methods, on-tool dust extraction (LEV), and mandatory FFP3 masks wherever dust can't be fully controlled.
- Waterproof protective clothing and gloves, to prevent cement burns and dermatitis during pours.
