

COMPANY POLICY

Responsible Sourcing Policy

MANAGING DIRECTOR Toby Green	ISSUED July 2026	REVIEW DATE July 2027	REFERENCE OF-POL-05
--	----------------------------	---------------------------------	-------------------------------

01 Why This Matters

Our purchasing decisions affect people and the environment well beyond our own operations. We only want to work with suppliers who take that responsibility as seriously as we do, to the people they employ, the communities they affect, and their environmental impact.

02 How We Do Business

We act with integrity in everything we do. We're open and transparent with everyone our supply chain touches, and we pay what we owe, on the terms we agreed.

03 Environmental Sustainability

We weigh up the environmental impact of goods and services before we buy them for our concrete flooring work.

- We monitor and review what, and how much, we buy, to cut waste.
- We work to reduce our carbon footprint wherever practical.
- We minimise materials with hazardous content.
- We expect our supply chain to run its own environmental policy, in line with best practice and the law.
- We expect suppliers to manage their own environmental impacts and targets, cutting waste where they can.
- We reduce waste to landfill through reuse, recycling, and proper waste segregation.

04 Procurement and Supply Chain

Our success rests on strong partnerships with our clients and our supply chain.

- Where practical, we favour local labour and local goods and services, to benefit the community.
- We buy locally where we can, to cut the carbon cost of transport.
- We expect suppliers to show real commitment to ethical working practices, fair wages, fair hours, and equal opportunities.
- We require every supplier and subcontractor to comply fully with the UK Modern Slavery Act 2015, no forced labour, human trafficking, or child labour, anywhere in their operations or supply chains.
