

OPUS FORM PARTNER GUIDE

Using the third-party portal

A plain-English guide to checking your assigned work, managing staff records, and sharing site information with Opus Form.

Document creator: Luke Williams — IT

Example data only

In this guide

1. [Quick start](#)

3. [Portal home](#)
4. [Your staff](#)
5. [Assigned sites](#)
6. [Using a phone](#)
7. [Good practice and help](#)

Your first five minutes

Use this short route when you need to check a site or send Opus Form an update.

- 1 Sign in.** Use your own portal account. Never use another person's link or password.
- 2 Check Portal home.** Look for anything marked **Action needed** or any recent conversation.
- 3 Open Assigned sites.** Select the site you need and check its status, staff, notes, and files.
- 4 Read before replying.** Check the author and date of the latest note, then add only factual, relevant information.
- 5 Verify the result.** After uploading or sending, confirm that the new item appears in the record before closing the page.

About the screenshots

The screenshots in this guide show the approved third-party portal layout with fictional Manchester test data. They are visual examples, not live records. Button names or available actions may change as the portal is released; follow the labels shown on your screen.

Before you start

The third-party portal is the part of Opus Form that approved partner organisations use. It only shows the people, sites, photos, notes, and files that Opus Form has made available to your account.

You will need

- ✓ Your portal email address
- ✓ Your password or secure sign-in link
- ✓ A phone, tablet, or computer with internet access

What you can do

- ✓ See your approved staff
- ✓ Open assigned site records
- ✓ Read notes and view site photos
- ✓ Add permitted staff, attachments, or updates

Keep access private

Do not forward your sign-in link or share your password. If someone else needs access, ask Opus Form to create access for them.

Portal home

When you sign in, the home page gives you a quick view of what is available and whether anything needs your attention.

Desktop example using fictional test data: Manchester College, Openshaw Campus, M11 2WH. Select the image to open it full size.

Portal home areas in the example layout

Area	What it tells you	What to do
Your staff	How many approved staff records you can see.	Open Staff to view details or start a staff submission if the button is available.
Assigned sites	How many current or upcoming sites are available to you.	Open Assigned sites to view a site record.

Area	What it tells you	What to do
Action needed	Whether something needs your attention.	Open the named item and follow the on-screen action.
Next up	Your most relevant site or recent conversation.	Select the row to open the detail view.

“Action needed” shows 0

In this example, there are no outstanding actions visible to this test account. Check the actual items on your screen rather than relying on a number alone.

Manage your staff

Use **Staff** to review the people Opus Form has approved for your organisation and check the documents held against each person.

Example staff page. Names, email addresses, and certificate details are fictional. Select the image to open it full size.

- 1 **Open Staff.** Select **Staff** in the left-hand menu, or use the staff shortcut on the home page.
- 2 **Find the person.** Check the name, role, and approval status. Select **Open profile** for the full record.
- 3 **Check certificates.** Review the certificate name, whether evidence is present, and any review or expiry message.
- 4 **Add or update information.** Use **Add staff member**, **Add certificate**, or the available upload control. Only submit accurate, current documents.

A “Review” status needs attention

It does not necessarily mean the certificate is rejected. Open the record and check the supporting evidence or contact Opus Form if the reason is unclear. A submitted staff member or certificate may remain pending until Opus Form reviews it.

Status glossary

Current / Active

The record is presently accepted or available to the account.

Review / Needs review

Opus Form needs to check information or evidence before it can be treated as current.

Expiring soon

The record may need renewed evidence before its expiry date.

Expired

The evidence is past its expiry date and should not be treated as current.

Open an assigned site

An assigned site brings the information for one piece of work together: location, status, staff, photos, notes, and attachments.

Example site record with areas for Overview, Photos, Notes, and Attachments. Select the image to open it full size.

Photos

Open **Photos** or **View gallery** to inspect images supplied for the site. Use the labels and dates to understand what each image shows.

Notes

Open **Notes** to read the latest conversation. Check who wrote a note and when it was added before acting on it.

Attachments

Use **Attachments** or **Upload file** when you need to provide an

Site status

Read the status and site details together. A completed site may

allowed document. Use a clear filename.

still contain records that are useful for your audit trail.

Adding a file

- 1 Select **Add attachment** or **Upload file**, if the control is available for that site.
- 2 Choose the correct file from your device. Check that it is the intended document and contains no unrelated personal information.
- 3 Follow the file-type and size rules shown by the portal. Do not assume that a photo or every file format is accepted.
- 4 Wait for the upload to finish before closing the page. If the file does not appear, try again once and then contact Opus Form.

Using the portal on a phone

The portal rearranges itself for smaller screens. The same information is available, but the navigation moves to the top or bottom of the screen and cards stack vertically.

Home page on a 390px-wide phone viewport;
select the image to open it full size.

Site record on a 390px-wide phone viewport;
select the image to open it full size.

- ✓ Use the fixed bottom navigation to move between Home, Staff, Sites, and More.

- ✓ Scroll down to see cards and buttons that do not fit side by side. The bottom navigation may cover the last few pixels while you scroll; move slightly further before selecting an item.

- ✓ Use **More** for options such as legal and privacy, theme, and logout.

- ✓ Keep the phone upright when uploading a document. Upload a photo only when the portal's upload control explicitly accepts it.

- ✓ If a button is hard to select, use the browser's normal zoom or switch to a larger screen; report the problem if it remains difficult.

Good practice and help

Before you submit

- ✓ Confirm the site and person are correct.
- ✓ Use a clear filename, for example Manchester-College-site-note-2026-09-26.pdf.
- ✓ Check that the document is readable and up to date.
- ✓ Do not upload passwords, payment card details, or unrelated personal data.

If something is wrong

- ✓ Refresh the page once.
- ✓ Check your connection and try again.
- ✓ Note the site name, time, and what you were trying to do.
- ✓ Contact your Opus Form contact and include a screenshot if possible.

What to include when asking for help

Send your organisation, site name, approximate time, device and browser, the action you were taking, the exact error message, and a screenshot if it contains no confidential information.

Remember

The portal is a shared working record. Keep entries factual, concise, and relevant to the site or staff member concerned. If your session expires, sign in again rather than sharing a new access link with someone else.
